

MMG Mobile App — App Not Working (Troubleshooting)

Customer Support Knowledge Base — Retrieval Source Document

Prepared for: 6D AARYA AI Fabric — MMG conversational assistant (Chatbot & WhatsApp) · RAG ingestion · Version 1.0 · September 2026

1. Purpose and Scope

This document is a retrieval source for an AI assistant that helps MMG customers when the mmg Customer mobile app is not working — it will not install, will not open, will not log in, crashes, freezes, is slow, cannot connect, or a transaction fails or shows an error. It is written for a non-technical customer and each section can be retrieved and used independently.

Scope: the mmg Customer app (iOS and Android) on the 6D Mobile Financial Services platform, and the MMGBusiness – Agent & Merchant app at a summary level. Account-level actions (reversing a transaction, unblocking or suspending a wallet, reporting fraud) are out of scope and are routed to their own use cases.

Use case mapping: MMG AI Use Case #10 “App not working” (RAG-based, **Chatbot & WhatsApp only** — steps refer to app screens, which are clearer in text). Related: Use Case #9 “Error message during transaction” uses Section 9 of this document.

Source note: app names, store listings and minimum iOS version reflect the Apple App Store listings for mmg Customer and MMGBusiness (September 2026). Items marked † — Android minimum version, error codes and SLA times — are illustrative demo values. Map the error table to the actual 6D MFS platform error catalogue and confirm SLAs with MMG before production use.

2. How the Assistant Should Use This Guide

Begin with the Quick Triage in Section 4. Ask one question at a time and wait for the answer before giving the next step. Capture the device type, OS version, app version and the exact error text or code as you go — these are needed if a support case is created. If the customer reports that money left their wallet but the transaction failed, or that their account is locked, move to Section 8/9 immediately. If the customer has already tried the basic steps or sounds frustrated, acknowledge this and move faster to escalation (Section 11).

- **Never ask for, accept or repeat** the customer’s PIN, password, OTP, full card number or CVV. If a customer types one, tell them not to share it and advise them to change it.
- **Read-only and guidance only:** the assistant explains how things work; it does not approve registrations, move money, reverse transactions, change account status or edit KYC details.
- **Sensitive actions route to their own flow:** transaction rollback, suspend/resume, emergency wallet lock, scam reporting, change of number/ownership, account termination and tier upgrade are handled by dedicated maker-checker use cases with back-office approval.
- **Do not guess figures.** For any fee, limit or processing time not stated in this document, tell the customer that the exact charge is shown in the app before they confirm, or offer to connect them to the Call Centre.
- **Voice BOT:** keep answers to two or three short sentences, read numbers slowly, and do not read out links — offer to send the link by SMS/WhatsApp instead.

3. App Information

Item	mmg Customer	MMGBusiness – Agent & Merchant
Who uses it	Registered individual customers	Agents and merchants
Publisher	Guyana Telephone & Telegraph Co. Ltd (One Communications)	Guyana Telephone & Telegraph Co. Ltd (One Communications)

Item	mmg Customer	MMGBusiness – Agent & Merchant
iPhone	iOS 15.0 or later	iOS 15.0 or later
Android	Android 8.0 or later†	Android 8.0 or later†
Download	Apple App Store / Google Play — search “mmg Customer”	Search “MMGBusiness”
Approx. size	About 180 MB (iOS); keep at least 500 MB free	Similar
Current version	Always use the latest store version (1.1.x series as of Sept 2026)	Latest store version
Not supported	Rooted/jailbroken phones, emulators, tablets on some models, basic (non-touchscreen) phones	Same

If the customer is still using an older MMG app, advise them to install the current **mmg Customer** app from the store and sign in with their existing number and password.

4. Quick Triage (Start Here)

Ask these questions in order:

1. “What exactly happens — the app won’t install, won’t open, you can’t log in, it crashes or freezes, or a transaction failed?”
2. “Do you see an error message or code? Please type it exactly or send a screenshot (hide any balances or personal details).”
3. “Are you using an iPhone or Android phone, and do you know the app version (Profile/Settings → About)?”
4. “Are you on Wi-Fi or mobile data, and do other apps or websites work right now?”
5. “When did it last work, and has anything changed since (phone update, new SIM, new phone)?”

Customer says	Go to
Can’t download or install	Section 5 — Installation
Can’t log in, PIN/password/OTP/fingerprint issue	Section 6 — Login Issues
App crashes, freezes, blank or white screen, very slow	Section 7 — App Issues
“No connection”, “Request timed out”, spinning loader	Section 8 — Connectivity
Transaction failed, declined, pending, money deducted	Section 9 — Transaction Issues and Error Codes
Many customers affected / app down for everyone	Section 10 — Outages and Maintenance

5. Installation

1. Open the Apple App Store (iPhone) or Google Play Store (Android) and search **mmg Customer**. Check the publisher is Guyana Telephone & Telegraph Co. Ltd — do not install apps from links sent by strangers.
2. Tap Get/Install. Make sure the phone has at least 500 MB free storage and a stable Wi-Fi or data connection.

3. If the store says the app is not compatible, check the phone's OS version (iOS 15+ / supported Android). Update the phone software in Settings, then retry.
4. If the download is stuck, pause other downloads, switch between Wi-Fi and mobile data, restart the phone and try again.
5. After installing, open the app and allow the permissions it requests (notifications, camera for document upload/QR, contacts optional).

6. Login Issues

Problem	Steps to resolve
Forgot password	On the login screen tap Forgot Password , enter your registered mobile number, and follow the secure reset link sent by SMS/e-mail to create a new password. The link can be used once and expires — request a new one if needed.
Forgot or wrong PIN	Use Forgot PIN in the app (or from Profile → Security) and verify with OTP to set a new PIN. After several wrong PIN attempts the wallet is temporarily locked for security.
Account locked after failed attempts	Wait for the lock period to end (+30 minutes) and try again, or reset the password/PIN. If it stays locked, contact the Call Centre — unlocking is done by MMG after verification.
OTP not received	Check the number shown, signal and SMS inbox space; wait 60 seconds and tap Resend. Restart the phone. Make sure the registered SIM is in the phone. If OTP still fails after 3 attempts, escalate.
Fingerprint / Face ID not working	Sign in with your password instead, then go to Profile → Security and switch biometric login off and on again. Re-enrol your fingerprint/face in the phone settings if you changed it.
"Device not recognised" / new phone	For your security, a new device must be verified with OTP on your registered number. Make sure your MMG SIM is in the new phone.
Changed or lost SIM	If the SIM was lost or stolen, call MMG immediately to suspend the wallet. After getting a replacement SIM with the same number, sign in and verify with OTP.
"Account suspended / inactive"	The wallet may be suspended for inactivity (3 months) or a security reason. The assistant can check the account status; reactivation is handled by MMG.

7. App Issues — Crash, Freeze, Slow or Blank Screen

Try these steps in order, checking after each one whether the app works:

1. **Close and reopen the app** — fully close it from recent apps, then open it again.
2. **Check for an update** — open the App Store / Play Store, search mmg Customer and tap Update if shown. Old versions may stop working after platform upgrades.
3. **Restart the phone.**
4. **Free up storage and memory** — keep at least 500 MB free and close other heavy apps.
5. **Clear the app cache (Android)** — Settings → Apps → mmg Customer → Storage → Clear cache. Do not tap Clear data unless you know your password, as it signs you out.
6. **Update the phone software** to the latest available version.
7. **Reinstall** — uninstall, restart, reinstall from the store and sign in again. Your money and history are safe; they are stored on MMG's platform, not on the phone.
8. **Check date and time** — set the phone to automatic date/time; an incorrect clock can cause blank screens and security errors.

If the app still crashes after reinstalling, capture the phone model, OS version, app version and what screen it crashes on, and escalate (Section 11).

8. Connectivity Issues

- Confirm other apps or websites work. If nothing works, the issue is the phone's internet connection, not MMG.
- Switch between Wi-Fi and mobile data; turn Airplane mode on for 10 seconds and off again.
- Check the phone has data balance or an active data plan.
- Turn off any VPN, proxy or data-saver/battery-saver setting that may block the app.
- On public or office Wi-Fi, try mobile data instead — some networks block secure payment traffic.
- **“Request timed out” during a payment:** do not repeat the payment straight away. First check the transaction history or ask the assistant for the transaction status to avoid paying twice.

9. Transaction Issues and Error Codes

9.1 Transaction Issues

Status	What it means	What to do
Failed	The transaction did not complete. Normally no money is taken.	Check the balance and history. If money was deducted but the transaction failed, it is usually auto-reversed within 24 hours. If not, escalate with the transaction ID.
Declined	Blocked by a rule: low balance, limit reached, wrong PIN, invalid recipient or biller details.	Read the error message (Section 9.2) and correct the cause.
Pending	Sent but not yet confirmed by the biller, bank or network.	Wait 15–30 minutes and check the status. Do not repeat the payment.
Reversed	Money has been returned to the wallet (auto-reversal or approved reversal).	Check the balance; the reversal appears in history.
Sent to wrong number	The transaction was successful to the wrong recipient.	Raise a reversal request within 30 days (Transaction Rollback use case).

9.2 Error Codes

Common app and transaction errors†. Match on the message text if the customer does not see a code.

Code	Message shown	Meaning	Recommended resolution
E101	Invalid PIN	Wrong transaction PIN entered	Re-enter carefully. After repeated failures the wallet locks — use Forgot PIN.
E102	Account locked	Too many failed login/PIN attempts	Wait for the lock period or reset password/PIN; escalate if it persists.
E103	Session expired	Signed in too long without activity	Sign in again.
E201	Insufficient balance	Wallet balance is lower than amount + fee	Add money or reduce the amount.
E202	Transaction limit exceeded	Per-transaction, daily or monthly limit reached	Reduce the amount, wait for the reset, or request an account upgrade.
E203	Wallet balance limit exceeded	Receiving would exceed the maximum balance	Spend or cash out some funds first, or request an upgrade.
E301	Invalid recipient	Number not registered or not active	Check the number, or send as a Mobile Money Order.

Code	Message shown	Meaning	Recommended resolution
E302	Invalid biller account	Biller reference/account number not recognised	Check the number on the bill and re-enter.
E303	Merchant not found	Wrong merchant number or merchant inactive	Confirm the merchant number with the merchant.
E401	Account inactive / suspended	Wallet suspended (inactivity, security or KYC pending)	Check account status; reactivation is done by MMG.
E402	KYC pending	Registration not yet approved	Wait for approval or ask for a registration follow-up.
E501	Request timed out	No response in time from network or partner	Check history/status before retrying; do not pay twice.
E502	Service temporarily unavailable	Biller, bank or MMG service is down or under maintenance	Try later; check for announced maintenance.
E503	Duplicate transaction	Same payment detected within a short time	Check history — the first payment may have gone through.
E601	OTP invalid or expired	Wrong or old OTP	Request a new OTP and use the latest one.
E602	Device not registered	New or changed device	Verify the device with OTP on the registered number.

10. Outages and Planned Maintenance

If many customers report the same problem, or the error says the service is unavailable, check for a known outage before troubleshooting the device. Planned maintenance is announced in advance through app alerts, SMS and MMG's social channels (@yourmmg) and is normally scheduled overnight. During an outage, tell the customer it is a known issue, share the expected restoration time if available, and advise them not to repeat payments. Agents can still be used for some services if only the app is affected.

11. Escalation Criteria and Support Process

11.1 When to Stop Troubleshooting and Create a Case

- The app still crashes or will not open after update, restart and reinstall.
- OTP is not received after three attempts on a phone with signal.
- The wallet stays locked, suspended or shows “device not registered” after the self-service steps.
- Money was deducted but the transaction failed and was not reversed within 24 hours.
- A transaction stays pending for more than 24 hours.
- The customer reports unknown transactions, a lost/stolen phone or a suspected scam — **escalate immediately** as high priority (Emergency Wallet Lock / Scam use cases).
- The same error appears after the recommended resolution has been followed.

11.2 ServiceNow / Zendesk Case Creation

The assistant creates a support case with: registered mobile number, customer name, issue category (Installation / Login / App / Connectivity / Transaction), device model, OS and app version, error code/message, transaction ID/date/amount (if applicable) and the steps already tried. It shares the case reference with the customer.

Priority	Examples	Target first response†
P1 – Critical	Lost phone, unauthorised transactions, suspected fraud	Immediate handover / within 1 hour
P2 – High	Money deducted but not credited, wallet locked	Within 4 business hours
P3 – Normal	App crash, login issue after self-help, OTP failure	Within 1 business day

The customer can check progress any time by giving the case reference to the assistant (Ticket Follow-up use case). When handing over, summarise what has been checked so the customer does not need to repeat the steps.

- **Call Centre:** 0664 (from a One Communications line), or 222-0664 (from Digicel, ENet or any other line). Hours: Monday to Sunday, 7:30 AM – 8:30 PM.
- **E-mail:** customerservice@mmg.gy for non-urgent account, service or document queries.
- **Walk-in:** MMG office, 4th Floor, Pegasus Corporate Suites, Kingston, Georgetown, Guyana.
- **Website / Web Portal:** www.mmg.gy — FAQs, agent locator (mmg.gy/agents), merchant list (mmg.gy/merchants) and Terms & Conditions.
- **Social media:** @yourmmg on Facebook and Instagram for announcements and promotions.

12. Frequently Asked Questions

Q: The MMG app keeps crashing. What should I do?

A: Close and reopen the app, update it from the store, restart your phone and make sure you have at least 500 MB free. If it still crashes, uninstall and reinstall it — your money and history are safe. If the problem continues, I'll raise a support case.

Q: I'm not getting the OTP.

A: Check that the number shown is correct, you have signal and your SMS inbox isn't full. Wait 60 seconds and tap Resend. Restarting the phone often helps. If it still doesn't arrive after three tries, I'll raise a case for you.

Q: I forgot my password.

A: Tap Forgot Password on the login screen, enter your registered number, and use the secure link sent to you by SMS/e-mail to create a new password.

Q: Money was taken but the payment failed.

A: Failed transactions are usually reversed automatically within 24 hours. Please share the transaction ID or date and amount; if it hasn't been reversed, I'll raise a priority case.

Q: My payment is showing pending.

A: Pending means it's waiting for confirmation from the biller or network. Please wait 15–30 minutes and check again, and don't repeat the payment in the meantime.

Q: Will I lose my money if I reinstall the app?

A: No. Your balance and history are stored securely on MMG's platform, not on your phone. Just sign in again after reinstalling.

Q: The app says my device is not compatible.

A: The app needs iOS 15 or later on iPhone, or a supported Android version. Update your phone software; if your phone can't be updated you may need a newer device.

Q: I got a new phone. How do I move my MMG account?

A: Put your MMG SIM in the new phone, install mmg Customer, sign in with your number and password, and verify with the OTP. If you lost the old phone, call MMG first to secure your wallet.

13. Maintenance Notes for This Document

Review after every major app release, when minimum OS versions change, when the 6D MFS platform error catalogue is updated, or when support SLAs change. Replace † illustrative values (Android minimum, error codes, SLAs, lock period) with MMG/6D-confirmed values before production go-live.
